

Connecting Stitchy to Alexa Echo Plus (Directly with no Philips Hue Hub)

This method of direct connection is the most direct way but does not allow for remote access or control and is only available by using the Amazon Alexa Echo Plus (2nd generation) unit which has Zigbee built in. While this is a quick way to connect up Stitchy it does not allow for any Siri or Google home control and therefore is not a suggested method (except for demonstration purposes).

1. With your Phone or tablet on the same network as the Philips Hue Hub open the Alexa App
2. Either create an account or input your Amazon account details. Remember you will be commissioning this up for your client. After putting your user details into login, all other data (such as address and locations) should be that of your clients.
3. "I'm Someone Else", input your clients first and last name (main user)
4. Click "Continue"
5. Either input your clients phone number for messaging and click "Continue" or click "SKIP"
6. Skip through the general information until you arrive at the home screen
7. Click on "Devices" in the bottom right corner
8. Click on "+" in the top right corner
9. Click on "Add Device"
10. Click on "Amazon Echo"
11. Click on "Echo Plus"
12. Click on "2ND GENERATION"
13. Click on device you are trying to connect and select from the different versions
14. Ensure your device is in setup mode. If not hold the dot down until you see the orange light rotating on the top of the Echo. Then select "YES"
15. Select your device under the "AVAILABLE DEVICES" list
16. Select your Wi-Fi network and add your password
17. Once connected to the Wi-Fi network click on CONTINUE
18. Add in your Echo's location (if you want to have it part of a "room") or click "Skip"
19. Test your devices operation

Extra help

Head over to melec.com.au for a free Stitchy calculator which allows you or your clients to calculate exactly what they need to turn their house into a voice-controlled powerhouse!

All electricians that pass our fundamental training course get listed on our website as Stitchy fundamental licensed installers. Due to M-Elec's marketing activities on social media, all leads for sales to direct end users will be funnelled back through them directly. Advanced courses coming soon where you can learn about multi-platform integration, advanced programming and more.

All M-World members can register their installation for a 3 year on-site warranty. M-World members also get access to pre-released products and Facebook group access where members share
