
Olympia Body Transformation

Olympia is all about positivity and a empowered attitude and the lighting needed to ensure that when members arrive they feel those emotions. When you walk into Olympia you immediately needed to 'feel' that you had entered a place which was far away from being a typical gym and a place to call home.

The lighting design needed to meet Australian standards but also create the atmosphere the client desired. With the brief and a skilled team M-Elec created a clear and concise plan and layout for multiple areas including walkways, lift foyers, display and feature lighting.

LOCATION

Ground Floor, 144 Edward Street, Brisbane CBD, Qld, Australia
